

MASTER WEBSITE PROMPT — AI DEEP WORDS

Enterprise Arabic AI Infrastructure Platform

Premium Silicon Valley-Level Website Direction

Build a world-class, cinematic, enterprise-grade bilingual website (English-first with Arabic support) for:

AI Deep Words

An Arabic AI infrastructure company specializing in:

- Arabic voice datasets
- NLP annotation pipelines
- medical-grade Arabic linguistic assets
- dialect-aware AI data
- enterprise Arabic AI infrastructure
- conversational AI datasets
- speech intelligence infrastructure

The company is NOT a generic AI startup. It is NOT a chatbot company.

This company should feel like:

- ElevenLabs meets Palantir
- Deepgram meets Vercel
- Enterprise infrastructure for Arabic AI

The visual identity must communicate:

- trust
- scale
- intelligence
- production-grade infrastructure
- linguistic expertise
- futuristic enterprise technology

The website should feel:

- cinematic
- premium
- calm
- intelligent
- sophisticated
- minimal
- futuristic without being flashy

Avoid:

- cheap startup aesthetics
 - crypto/neon overload
 - exaggerated cyberpunk visuals
 - cartoonish AI graphics
 - template-like SaaS design
-

BRAND POSITIONING

Primary Positioning:

"Building the Linguistic Infrastructure for Global AI"

Secondary Positioning:

"Production-grade Arabic AI data infrastructure across 22+ countries and 32+ dialects."

Core Narrative:

Arabic is one of the world's most spoken languages, yet remains critically underrepresented in AI training infrastructure.

AI Deep Words exists to solve this permanently through:

- enterprise Arabic datasets
- dialect-aware speech infrastructure
- medical-grade NLP assets
- scalable annotation pipelines
- secure AI data operations

This is an infrastructure company powering the next generation of Arabic AI.

TARGET AUDIENCE PRIORITY

Primary:

- Enterprise AI companies
- Speech AI companies
- LLM developers
- Government AI initiatives
- Healthcare AI companies

Secondary:

- AI startups
- Research labs
- NLP teams
- Conversational AI builders

Tertiary:

- Developers
- MLOps engineers
- Speech researchers

DESIGN STYLE

Design Inspiration:

- ElevenLabs
- Palantir
- Vercel
- Stripe
- Deepgram
- Linear
- Raycast

Visual Style:

- dark premium UI
- cinematic gradients
- subtle glassmorphism
- minimal layouts
- large typography
- smooth motion
- sophisticated whitespace
- premium enterprise feel

The UI should feel:

- expensive
- modern
- precise
- scalable
- intelligent

COLOR SYSTEM

Primary Background:

050505

0B0F14

0F1720

Accent Colors: Deep Blue Glow Soft Cyan Muted Purple Subtle Emerald

Avoid oversaturated colors.

Use elegant gradients and soft ambient glows.

TYPOGRAPHY

English:

- Inter
- Space Grotesk

Arabic:

- IBM Plex Sans Arabic
- Alexandria

Typography Style:

- bold headlines
 - large hero typography
 - spacious layout
 - premium editorial hierarchy
-

MOTION & INTERACTIONS

Motion style should be:

- smooth
- premium
- cinematic
- subtle

Use:

- Framer Motion
- soft fade transitions
- waveform animations
- hover glows
- parallax movement
- animated grid backgrounds
- subtle AI pulse effects

Avoid:

- aggressive animations
- distracting movement
- overdone futuristic effects

WEBSITE STRUCTURE

1. HOMEPAGE

Purpose: Create instant trust and establish category leadership.

HERO SECTION

Large cinematic hero section.

Background:

- animated waveform
- subtle moving gradients
- ambient glow
- soft AI particle motion

Headline:

"Building the Linguistic Infrastructure for Global AI"

Subheadline:

"Production-grade Arabic voice, NLP, and medical datasets powering the next generation of speech and language AI across 22+ countries and 32+ dialects."

Primary CTA:

- Start a Project

Secondary CTA:

- Explore Services

Third CTA:

- Listen to Voice Samples

Hero Metrics:

- 22+ Arab Countries
- 32+ Arabic Dialects
- 4,000+ Hours Voice Data
- 15M+ Words Dataset
- 97.4% Accuracy Rate

Add:

- interactive waveform
 - playable Arabic voice samples
 - dialect switching
 - premium audio visualizer
-

TRUST SECTION

Display:

- enterprise trust indicators
- compliance badges
- AI ecosystem compatibility

Include:

- HIPAA
 - GDPR
 - Secure Infrastructure
 - Human-in-the-Loop QA
-

THE ARABIC AI GAP

Split-section storytelling.

Left: Problem.

Right: AI Deep Words solution.

Problem points:

- Arabic dialect fragmentation
- lack of production-grade datasets
- weak dialect coverage
- poor medical/legal Arabic AI support

Solution points:

- native speaker pipelines
- dialect-aware QA
- secure enterprise workflows
- large-scale Arabic infrastructure

Add animated infrastructure visualization.

DATA PIPELINE VISUALIZATION

Animated flow:

Collect → Validate → Annotate → Multi-Layer QA → Secure Processing → Enterprise Delivery

Use cinematic infrastructure-style graphics.

SERVICES SECTION

Display services as enterprise infrastructure pillars.

1. Voice Intelligence
2. NLP Solutions
3. Medical AI Infrastructure
4. Dialect Annotation
5. Speech Data Pipelines

Each card:

- premium icon
 - subtle motion
 - enterprise copywriting
 - hover animation
-

INTERACTIVE PLAYGROUND

One of the MOST important sections.

Features:

- type text
- choose dialect
- choose voice tone
- play generated audio

Dialect examples:

- Saudi Najdi
- Saudi Hijazi
- Gulf
- Egyptian
- Levantine
- MSA

Voice tone examples:

- professional
- customer support
- sales
- calm narration

UI must feel:

- premium
- instant
- responsive
- elegant

No login required.

DATASET SCALE SECTION

Show:

- dataset size
- dialect coverage
- voice hours
- annotation categories
- medical corpora
- NLP assets

Visualize data geographically across the Arab world.

COMPETITIVE ADVANTAGE

Headline: "Why AI Deep Words"

Key differentiators:

- 32+ dialects
 - native speaker network
 - enterprise compliance
 - medical-grade assets
 - human-in-the-loop QA
 - scalable delivery
 - Arabic-first infrastructure
-

INTEGRATIONS

Enterprise integrations section.

Include:

- REST APIs
- HuggingFace
- AWS SageMaker
- Azure ML
- Whisper
- Kaldi
- ESPnet
- Coqui TTS

Use animated integration cards.

FINAL CTA

Large cinematic CTA.

Headline:

"Power Your Arabic AI Infrastructure"

Buttons:

- Start a Project
 - Contact Enterprise Sales
-

2. SERVICES PAGE

Dedicated sections for:

- Voice Intelligence
- NLP Solutions
- Medical AI
- Annotation Pipelines
- Dialect Infrastructure

Each service should include:

- workflow
 - process visualization
 - dataset examples
 - enterprise benefits
 - compliance
 - delivery structure
-

3. DATASETS PAGE

Enterprise-grade dataset catalog.

Features:

- filtering
- dialect selection
- metadata preview
- dataset statistics
- export formats
- coverage maps

Must feel:

- highly technical
 - structured
 - production-ready
-

4. DEVELOPERS PAGE

Developer-first experience inspired by:

- Stripe
- Vapi
- Deepgram

Include:

- API snippets
- SDK examples
- response speed
- authentication flow
- infrastructure architecture
- endpoint explorer

Languages:

- Python
- Node.js
- REST API

5. DOCS PAGE

Modern technical documentation.

Features:

- sidebar navigation
- search
- API references
- code examples
- SDK installation
- webhook documentation

Style:

- clean
 - readable
 - highly technical
-

6. ABOUT PAGE

Mission-driven storytelling.

Position company as: "The infrastructure layer powering Arabic AI."

Include:

- mission
 - vision
 - linguistic impact
 - future of Arabic AI
 - infrastructure philosophy
-

TEAM SECTION

Use premium monochrome portraits.

Display:

Head of Technology — Asim Ibrahim Leads data engineering, automation pipelines, and secure infrastructure — including diarization tooling, encrypted storage, PII workflows, and enterprise delivery systems.

Head of Delivery & Executive Director — Abdulaziz Al-Tamri Leads company strategy, enterprise partnerships, and large-scale Arabic AI data programs — aligning delivery, security, and measurable quality outcomes across every engagement.

Head of Linguistics — Muath Al-Hulwani Directs dialect coverage, linguistic QA, and annotation standards — ensuring accurate representation across 32+ Arabic dialects using native-speaker validation workflows.

Project Management — Abdullah Abdullatif Drives operational coordination, contributor workflows, milestone execution, and delivery management across enterprise Arabic AI data programs.

7. CAREERS PAGE

Modern AI-company careers page.

Include:

- company culture
- remote opportunities
- linguistic specialists
- AI engineers
- annotation operations
- research roles

Tone:

- ambitious
 - mission-driven
 - elite team culture
-

8. CONTACT PAGE

Enterprise-focused contact experience.

Include:

- enterprise inquiry
- government inquiry
- partnership inquiry
- developer inquiry

Email: partner@aidpwords.com

TECH STACK

Frontend:

- Next.js

Styling:

- Tailwind CSS

Animations:

- Framer Motion

Audio:

- Web Audio API

CMS:

- Sanity

Hosting:

- Vercel

Analytics:

- PostHog
-

UX REQUIREMENTS

The experience must feel:

- instant
- responsive
- frictionless
- enterprise-grade

Users should immediately feel:

- trust
 - scale
 - technical depth
 - premium quality
-

FINAL GOAL

The final result should feel like:

"The definitive infrastructure company powering Arabic AI globally."

NOT:

- a startup template
- a chatbot website
- a generic AI landing page

The website should establish AI Deep Words as:

- the category leader
- the enterprise standard

- the future of Arabic AI infrastructure
- the Arabic equivalent of companies like Deepgram, ElevenLabs, and Scale AI
